PLAN TO ARREST 6 LABOR MEN

NEW YORK, Oct. 3.—The arrest of six and probably more labor leaders of this city, who are closely affiliated with the affairs of the International Structural Workers' Association, soon will be made, it was announced today, as the result of the startling confession of George E. Davis, alias George O'Donnell, whose dramatic outburst in the East revealed those of the McNamara brothers and O'Donnell in the West.

The announcement was made today by Walter Davis, president of the National Erectors' Association, which organization was the target for the attacks of the dynamiters.

Plan for Arrests.

"Consideration of practically every statement made in the Davis confession has been obtained by our detectives," said Davis today. "First, as soon as a few minor points in this confession are straightened out we will move for the arrest of these men. At least six, and probably more, are involved. All of them have been prominently identified with the structural iron workers' association, by whom Davis confessed he was employed."

"I will say at this time, however, that the officers of the American Federation of Labor are in no way involved in the investigation we are making."

Price on Burns' Head.

Davis said he had only a \$250 reward but that he was asked to kill besides. He said the victim was in a taxi cab.

Continued on Page 4, Column 4.

DYNAMITERS' PRICE LIST AS REVEALED IN DAVIS STATEMENT

Prices which George E. Davis, head of the Burns Detective Agency—\$5,000.

To kill William J. Burns, head of the Burns Detective Agency—\$5,000.

To kill Walter Drew, head of National Erectors' Association—\$5,000.

To kill Bader—\$3,000.

To blow up the Queensborough bridge—\$2,000.

In other cases he was paid for each dynamite—\$200.

THE MAN FACTS OF ELLIOTT

The Public Service Commission today, following Governor Fox's suggestion, sent President Elliott of the New Haven a letter formally demanding a complete accounting for the New Haven's "underground fund."

The commission is determined to find out to whom every dollar of the fund was paid, and whether it was paid to these persons. Public officials, lobbyists, lawyers, legislators and representatives at the State House of some newspapers and news agencies, have been listed as recipients of money from this fund.

In the letter to Mr. Elliott, the commission asks him to furnish, and as soon as possible, all such information and vouchers as may facilitate the inquiry requested by the Governor.

Meanwhile the inquiry into the cause and effect of this fund has been begun. The commissioners in their letter to Elliott incited Governor Fox's letter to them of September 21.

In that letter the Governor declared that a full inquiry and the fullest possible investigation, and President Elliott has replied that he will be glad to aid in every way.

The "underground fund," the apparent purpose of which was to avoid public and legislative opinion, exists in the neighborhood of \$150,000.

Son Is Born to Mrs. E. R. Thomas

NEW YORK, Oct. 3.—Word was received here today from Paris of the birth of a son to Mr. and Mrs. E. R. Thomas.

The father had a spectacular career in banking and sporting circles in this country. His present wife is Elizabeth C. Finley and they were married in New York on November 5, 1912, after half a dozen New York ministers had refused to marry them.

Report Mackay Girl at Private School

NEW YORK, Oct. 3.—Miss Katherine Mackay, the young daughter of Mrs. Clarence Mackay, has left the Blue-Curtain. She rode away in one of her father's automobiles with a governess. It was reported that she had gone to a private school in Washington, D. C.

Report King Gustav Is Ill with Cancer

STOCKHOLM, Oct. 3.—King Gustav of Sweden was said by illness while journeying from Skarsholm Castle in Sweden to Aarhuus, in response to an invitation from Count Frederiksen to join him in a hunting expedition, is reported to be suffering from cancer.

Fine Newton Man in Auto Case

Alexander Fraser of No. 26 Westman street, Boston, was before the Newton court today charged with refusing to stop his automobile when ordered to by an officer. He pleaded not guilty, but was fined \$25 and cost.

President to Sign Tariff Bill Tonight

WASHINGTON, Oct. 3.—The completed Underwood tariff bill approved today by the House in the form in which it left the Senate, was signed by Speaker Clark and Vice-President Marshall. It will be signed by President, probably at 9 o'clock this evening, in the presence of the House Ways and Means and Senate Finance Committees.

24 Hurt When Wild Car Jumps Tracks

Two May Die From Scranton, Pa. Trolley Accident.

SCRANTON, Pa., Oct. 3.—Twenty-four persons were injured, two probably mortally, and fourteen seriously, when a trolley car of the Scranton Electric Railway Company ran beyond control of the motorman, jumped the track and crashed into a trolley pole here today.

The car was descending the track at grade when the brake cylinder failed to work. The car ran wild for two blocks, then left the rails. Fifteen members of a party of twenty persons, who were on their way to work, were pinned beneath the car. Two of these men were crushed and may die.

Master Is Named in Rantoul Case

Henry F. Hurst to Hear Charges of Wife in Famous Suit.

Judge McLaughlin today appointed Henry F. Hurst to sit as master on the pending motion by Mrs. Lila H. Rantoul against her husband, Edward H. Rantoul, charging that he has not obeyed the terms of the decree under which they were divorced and she brought was abolished.

The suit was abandoned after she had obtained the divorce. She said she had been abandoned by her husband, who had refused to take her with him to the United States. She said she had been abandoned by her husband, who had refused to take her with him to the United States.

Call Stable Next to Navy Yard Nuisance

A mail hearing was held today before Judge Lodge in the United States District Court on the bill brought some time ago by the United States to restrain Judge Charles F. O'Brien from maintaining his stable on the premises adjoining the navy yard.

The bill was brought by the navy yard, which is the property of the United States. The bill was brought by the navy yard, which is the property of the United States.

Report King Gustav Is Ill with Cancer

STOCKHOLM, Oct. 3.—King Gustav of Sweden was said by illness while journeying from Skarsholm Castle in Sweden to Aarhuus, in response to an invitation from Count Frederiksen to join him in a hunting expedition, is reported to be suffering from cancer.

Fine Newton Man in Auto Case

Alexander Fraser of No. 26 Westman street, Boston, was before the Newton court today charged with refusing to stop his automobile when ordered to by an officer. He pleaded not guilty, but was fined \$25 and cost.

Duke of Orleans Arrives in Peru

LIMA, Peru, Oct. 3.—Prince Louis Philippe, Duke of Orleans, pretender to the French throne, arrived here today. He is traveling incognito under the title of Count de Villiers.

Humphries Is 33rd Victim of Aviation

SALISBURY, England, Oct. 3.—John Humphries of the British aviation corps was killed here today in a crash with his aeroplane. He is the 33rd victim of aviation.

MAN SHOT, MURDERERS CHARGED

SPENCER, Oct. 3.—Positive identification has been discovered surrounding the death of Joseph C. Carrell, which was held to shift to the "murderers," declared State Attorney General William F. Murphy today following his own and the investigation of Robert D. Murphy, another detective and crime specialist.

Carrell, who had shot his wife for a crime and asked for \$2,500 ransom, sent from the Western Asylum, where he was employed, to his home in Spencer. As he stepped outside the house on leaving a shot was heard and he was found dead on the grass.

Mrs. Carrell stated that he had shot himself. A gun was found lying on the lawn. The police, who picked up Carrell, said that while he had been shot through the heart, no bullet hole was to be found in his vest. The State detective says that Carrell had a gun. Leslie Carrell, the dead man's brother, has declared that his brother was murdered.

Manuel and Bride Are Reconciled

MUNICH, Germany, Oct. 3.—Rural peace makers have succeeded in effecting a reconciliation between ex-king Manuel and his wife, Princess Augustine. The king and his wife, who had been separated since the king's flight from Spain, were reconciled today.

The king and his wife, who had been separated since the king's flight from Spain, were reconciled today.

Only Two Letters.

He seemed to act as if I would be treated as a criminal, and I was not at all sure of my own safety. I was not at all sure of my own safety. I was not at all sure of my own safety.

McKernolds Ousts U. S. Judge at Nome

WASHINGTON, Oct. 3.—Judge Charles H. McKernolds of the District Court at Nome, Alaska, was removed from office by Attorney General McKernolds today. Judge McKernolds declined to resign when requested. The Attorney General stated that the removal was for the incompetency of the service.

District Attorney Bernard A. Bailey's resignation has been accepted.

Bank Treasurers Worcesters Guests

WORCESTER, Oct. 3.—A large number of savings bank treasurers came here today to attend the annual meeting of the Treasurers' Club of Massachusetts. President Charles S. Norris, treasurer of the Boston Home Savings Bank, had charge of the meeting, which consisted of an afternoon of golf at the Falmouth Country Club and a banquet at the Hancock Hotel in the evening. Professor Hoadley A. Thayer of Clark University made an address.

Never Told Her.

In the fall he tried to leave the house and finally succeeded in reaching the street. When he got out he was told that he was not to go out. He was not to go out. He was not to go out.

MRS. SARAH MAUD WAITT, who today secured a divorce from her husband, Albert H. Waitt, Newton real estate dealers and clubman, on grounds of intoxication.

She was married in Boston, September 1, 1907, and lived in Newton. Her husband drank a great deal during our last years together, and was extremely dissipated and violent. He used to come home intoxicated several times a week. Last winter I was forced to take a trip to California.

He seemed to act as if I would be treated as a criminal, and I was not at all sure of my own safety. I was not at all sure of my own safety. I was not at all sure of my own safety.

HARRY MAY GO BACK TO CANADA

WASHINGTON, D. C., Oct. 3.—Harry Thaw's fate is an international question. Canada, England and the United States are involved. Joseph W. Folk of Missouri, once candidate for the nomination for President, and now a special solicitor in the State Department, is in charge of the negotiations.

On Monday a decision will be announced as to whether the State Department will demand that Thaw be accorded treaty rights in Canada, which were denied him when he was formerly deported. If the decision is to demand these rights, Thaw may be deported again to Canada.

The State Department is planning to request a list of Thaw's assets. After Governor Folger of New Hampshire announces his decision on the question of extradition, the case will rest with the Federal courts on the writ of habeas corpus, and will be decided in Boston.

Final Test in Boston.

In Boston, therefore, the final test of Thaw's sanity may come.

Mr. Folk, former Governor of Missouri, returned the New York laws today. He said:

"It is as though Thaw is making a monkey of the New York law, but that is not so. The State law regarding contracts of insanity imposed instead of annulment of quiet in similar cases is strongly concurred. The New York law, however, is faulty in this respect and should be changed."

The British government, without waiting for a response from Mr. Thaw, has interrogated the Canadian authorities.

EVELYN THAW

Tells how she met Stanford White and how he won her confidence in the double page instalment of her own story written by herself in

NEXT SUNDAY'S AMERICAN

EVELYN REVEALS STANFORD WHITE'S DOUBLE CHARACTER—KIND MAN AND SCHEMING ROUE

It might be unjust at this moment to explain every action of Stanford White in the light of his subsequent conduct. I have no doubt in my mind that in many of the things he did White was actuated by the purest kindness. Such was the complexity of the man's character that he could at one and the same time be the disinterested patron and the scheming roue.

He had established himself in my mother's good graces, was a frequent visitor at our home. —From Evelyn Nesbit Thaw's new book, "The Story of My Life," now appearing in the Boston Sunday AMERICAN. The second instalment will appear next Sunday. The most interesting life story told in years.

THE LOVE STORY OF HARRY AND EVELYN

CHAPTER XXXV.

"As proper men as we shall see in a former day" (A Midsummer Night's Dream).

Whether else the world might say of him, Harry Thaw was making a delightful impression in two quarters in the town.

One was on the prison chapel, Rev. Mr. A. Wade, D. D.

The other place where Harry made a hit was among his fellow prisoners. They all liked him, from the murderers to the cheap pickpockets.

When Harry was locked up, the news quickly ran around the Tomb. It was

centered from well to well and corridor to corridor. The general comment was that Harry was a good fellow and a very nice fellow. "What!" this rich girl thinks his money will save him. Hope he gets sent to the chair. He doesn't think he can build in here and put anything over on Kip. He won't look at a convict for a minute. These hardened characters were proud, when all met at morning exercises, to see Thaw turn up his nose at the common law and refuse even to speak to them.

Democratic as Possible.

They were generally surprised, therefore, to find Harry was quite democratic and generous. The latter quality made a particular impression.

Harry walked and chatted with many of his prison mates. There was hardly one with whom he did not make friends. He was as democratic as possible. He listened to their stories. He sympathized at their complaints against the police and the law.

Harry Thaw had small sums of money. To some others he promised help of one kind or another. He interested himself in every story told him. Harry was especially interested in some of the so-called "bad men," among the prisoners. He quizzed them whenever he had a chance at exercise time. He was so frank and sympathetic with them that they were confident. Some remarkable stories were poured into Harry's attentive ear.

Before Harry had been in the Tomb a week he was one of the most popular prisoners in the place. He received all kinds of encouraging and sympathetic messages and a great variety of advice as to how he should "beat the chair."

Harry was the prison chaplain's heart from the first by his surprising and interesting life-like story.

Dr. Wade was a simple, practical, and to be caught by every ready reformer. But he was prepared for any kind of sympathy with Harry Thaw.

He was the public's surprise, therefore, when the good chaplain gave out the following statement:

Likable Chap, Says Chaplain.

I have found Thaw to be a very likable sort of a chap. The impression gained from personal contact with him differs materially from the impression one gets from the stories that have been printed about his personality and his pranks.

He has been several times and have talked at considerable length with him. I must say that I have been surprised at his calm and information, which most persons lack who have had the sort of life he is said to have had.

He has told himself well informed on religious matters of various kinds and especially on those relating to the Protestant Church. He makes a good listener and is very ready to talk with men who have a good conversation on topics of an academic nature, and I hope to have many interesting hours with him.

My sympathies are with him in his present difficulty, and I must say I hope that the law will acquit him of the crime of murder.

Dr. Wade was an Episcopalian, while Harry had been brought up as much as possible in the Presbyterian faith. His mother was the leading member of the Third Presbyterian Church at Pittsburgh. But Harry had never shown any pious tendencies, even in the slightest. Harry was most much in church. His rules of conduct were not such as the church endorses.

But Dr. Wade seemed to have a special interest in Harry. According to the worthy chaplain, Harry discussed matters of religion with both Catholics and Protestants. He displayed knowledge of church forms and a grasp of religious ideas that were quite refreshing to the clergymen.

Jerome in Boston.

Meanwhile, District Attorney Jerome, returning from his Canadian vacation, was getting nearer and nearer New York. When he arrived in Boston and crossed from the North to the South Station he was held up by a Boston reporter for a long time. He was asked many questions. When asked what Thaw would be tried for, he said he would be tried for murder. "Then Thaw will have to stay in the Tomb all through the hot summer," he was asked.

"I don't see any way out of it," answered Jerome. "There are no other murder cases to be tried and all these have waited longer. Their turn comes first."

Another comment. It never was brought to my attention.

Jerome's statement, which on Boston in New York, showed nothing to encourage the defense, was a grim determination to prosecute Harry to the fullest extent of the law.

That Sunday night, while Jerome was talking in Boston, a man was dying in the Presbyterian Hospital, New York. He was William Bradford. Harry Thaw's father, the man who had bought his mother's eyes and had been in the hospital for some time, died the morning after the shooting. He had been suffering with appendicitis and had been operated upon. Complications set in and death approached.

Assistant District Attorney Garson secured an autopsical statement from Bedford that confirmed Evelyn's charges to Harry.

(To Be Continued.)

Was Evelyn Worthy?

Was Evelyn Nesbit Thaw worth saving? Nearly everybody in New England believes that she was. Gertrude Althorn, the novelist, stirred society by declaring that Evelyn was not worth saving. There are a few more letters expressing the opinions of AMERICAN readers:

"No Place in Society."

Gertrude Althorn says that Stanford White was a genius and worth more to the world than Evelyn. This may be true so far as art was concerned. There are, however, higher things in this world than genius. White looked character and lacking that had no moral right to a place in society. Evelyn merely engaged, herself, accordingly stood on a higher plane. We have the laws of God and the laws of man. White violated both. We say that he was better than Evelyn. I am ashamed that any woman should ever support such a thing.

SADIE DAYENPORT.

Give Her the Doubt.

If Evelyn Thaw is not worth caring what will become of the many thousands like her? I am ashamed that any woman should ever support such a thing.

SEUDENT.

"Has Gone Too Far."

This decision given to the case of Boston, and in fact all New England, an opportunity to assert themselves upon a subject that is very vital to society. It is true that the world is supposed to be forgiving and forgetful, but how many times has it done so? Lady Hamilton, who played with the heart of Lord

SERIOUS CATARRH YIELDS TO HYOMEI

He was to time and one Hyomei at the first warning of catarrh. Do not let the disease extend along the delicate mucous membrane, gradually going from the nose to the throat. Hyomei gives quick relief, and downward until the lungs are reached and you are in danger of consumption. Hyomei will effectively relieve all catarrhs and cures the throat. It is an uniformly successful remedy. It is always sold on money back if not benefited.

There is no other treatment for catarrh that is like Hyomei. Just as good. Now you can take it place. Hyomei gives quick relief, and downward until the lungs are reached and you are in danger of consumption. Hyomei will effectively relieve all catarrhs and cures the throat. It is an uniformly successful remedy. It is always sold on money back if not benefited.

Begin the use of Hyomei today and you will soon find that the offensive breath, the droppings into the throat, the discharge from the nose, the inflammation and all other symptoms of catarrh are overcome. The most recent catarrh (throat and nose) of liquid condition has been cured by Hyomei. It is a safe remedy. 50 cents by drugstore everywhere.

GIRL IN OELRICHS CASE BEARS 16 WOUNDS

Fellow Fraternity Members of
Accused Youth Predict Affair
Will Be "Hushed."

NEW YORK, Oct. 2.—For how many, if any, of the fifteen accused youths in the Oelrichs case, the prediction of fellow fraternity members that the case will be "hushed" is a prediction of a very real future.

**Clears Face of
Pimples, Blackheads**

Wonderful ZEMO Also Stops
Terrible Itching AT ONCE;
Cures All Skin Troubles.

Get a 25c Bottle of ZEMO Today.
"At last!" At last! One application of ZEMO, the wonderful new treatment, quickly put an end to those awful, humiliating pimples and blackheads. For the first time in months I have been ashamed to go out in public. A trial of ZEMO will convince you of its astonishing results in clearing the complexion.

ZEMO is a clean, antiseptic, non-irritating cream, which cleanses the skin, removes all pimples, blackheads, and all other skin troubles. It also cures itching, eczema, and all other skin troubles. It is the only skin treatment that gives instant relief.

Miss Singleton is badly wounded. She has sixteen wounds—some were serious—and some only, local ones.

Some of these wounds were received when the automobile in which young Oelrichs was driving her across a tree.

The two were driven through the windshield and the broken glass is held responsible for at least some of the wounds.

One physician has declared that only one of the wounds have been caused by stabbings.

A fact thought significant is that though young Oelrichs and the girl were both thrown through the windshield in the crash, Oelrichs escaped with a small cut on his nose, while the girl is a mass of gashes.

Oelrichs was found summoned to appear before the faculty of Columbia University and explain his escapade with Miss Singleton.

Dean Nathan Stone of Columbia said he would get all the facts in the case. Oelrichs may be expelled unless he can clear himself.

In the meantime Miss Singleton, who had seemed to an affair that Oelrichs assaulted her, has changed front and is showing her former attitude.

"It's all a terrible mistake," said Miss Singleton at her apartment, "Herman didn't stab me. The police have it all wrong."

It is believed that the charge will be withdrawn before the Oelrichs case comes up in the Eastern Police Court next Tuesday.

However, Deputy Police Commissioner Dougherty declares that he has seen the case and is determined to ascertain the identity of the third person in the car when the alleged shooting occurred.

Interesting stories are told of Miss Singleton's life, and of how she and Oelrichs became acquainted.

The girl is wealthy, with an income of about \$100 a week. Two years ago she rented an apartment in New York.

She made a most distinguished friend—the Princess Olga Golitsina, the Russian aristocrat who fled to the United States last June and was chased around the city by agents of the Czar's secret service.

The Princess shared an apartment with Miss Singleton. According to the story told here, Miss Singleton's efforts to teach the Princess to sing in the "Trail of the Lonesome Pine" created a furore in the D. K. E. Fraternity and caused for Miss Singleton many college boy friends.

There are various versions of the first meeting between the girl and the student. The girl who was introduced to Oelrichs in the Pennsylvania station, Oelrichs, who was at the time known her but a short time.

The young man is a Columbia sophomore, and a member of the Delta Phi fraternity, which is the largest of the fraternities at Columbia.

Oelrichs' Thrills of Recent Years Now at a Climax

Herman Oelrichs, the young millionaire who is accused of having stabbed Miss Lucille Singleton, has had many thrilling adventures.

He won a \$100,000 wager from his aunt, Mrs. William K. Vanderbilt, Jr., by abstaining from drink and tobacco until his twenty-first birthday.

He is an ardent speed enthusiast and, at the wheel of his sixty-horse power machine, he has had many thrilling races with Vincent Astor.

In June of this year he swam from Battery to Hatteras Beach at Newport in forty minutes.

One month later he saved a group of children from being trampled to death under the hoofs of a runaway horse.

He signed up a wireless station on the roof of his mother's Fifth Avenue home.

During the summer he and young Vincent Astor, his cousin, charmed the waters of the Indians with their powerful motor boats.

In 1904 he assisted Franklin D. Roosevelt in the construction of what he called an automobile yacht. It was a cutter rigged out equipped with automobile tires.

Of this affair, was the way one of the Delta Phi men put it: "You wait till the weight of influence—and it will be of the 'weight' variety—reaches certain persons higher up in the police department, and you'll find the case will be suddenly hushed. Oelrichs will get off all right."

Of course this may be spinning out the net, but of the "my big brother-will-get-me-out" type, who thinks he knows it all and doesn't know any better. And again it may be.

When Commissioner Dougherty heard the news he said: "I don't know what a red rag would do to him. He had just been told that Lucille Singleton, one of the best men on his staff, had advised Miss Singleton when he saw her to settle the case out of court, and the last thing that 'pull' was going to pull the case out of court."

Miss Singleton Now Denies the
Young Millionaire Stabbed
Her; Calls It "Mistake."

reckless millionaire out of the fire struck in his throat. He suspended Trayer.

In explaining his escapade, he the Delta Phi men, Oelrichs said that two weeks for the telephone call to the fraternity house ring and a woman's value.

He said that he had been told that the receiver, turned to the other fraternity men and said:

"Say, there is a girl you wouldn't have trouble meeting?"

"Why didn't you give one of us a show?" asked Oelrichs. Just then the telephone bell rang and young Oelrichs hastened to answer it.

What the other students in the fashionable fraternity house at No. 434 Riverside Drive say they heard was this conversation:

"Why, hello, yes, we were cut off—surely—yes, this is Mr. Oelrichs. When can I meet you? Wouldn't you like to take an automobile ride with me? I have a machine, but I can rent one. Very well, let's make it two days away."

After getting up the phone, Oelrichs laughed heartily. The other fraternity men did not believe he would meet the girl. But he did. He met her as "Miss Oelrichs," it is said. His explanation was that he had no evil intentions toward the girl, and so permitted her to believe he was a student of the man he had asked for.

"And by all the bonds of our fraternity, I want to say I did not stab this girl," Oelrichs declared. That seemed to satisfy the fraternity men.

In 1904 he assisted Franklin D. Roosevelt in the construction of what he called an automobile yacht. It was a cutter rigged out equipped with automobile tires.

Of this affair, was the way one of the Delta Phi men put it: "You wait till the weight of influence—and it will be of the 'weight' variety—reaches certain persons higher up in the police department, and you'll find the case will be suddenly hushed. Oelrichs will get off all right."

This is the label that you will always find sewed on the outside of the inside breast pocket of MORSE-MADE

CLOTHES OF REFINEMENT \$25

It identifies the finest type of ready-made clothes that are produced anywhere.

From the total number of our operatives (600), we selected one hundred and fifty of exceptional skill.

These picked men devote their whole time, from Jan. 1 to Dec. 31, to the production of "Clothes of Refinement."

Their value to us, as tailors, does not depend on the number of garments they turn out. 600 suits per week is the limit of their output, because of the exacting care they exercise at every stage of the construction.

The coats have snug fitting collars, natural shoulders, hand-tailored and hand-finished at every point where hand work should be used.

We show over forty different styles that enable us to satisfy young men of radical ideas, as well as their more conservative brothers.

In either case, we give a degree of value in these suits at \$25 that is positively unequalled.

In addition to regular sizes, we have stouts, longs, shorts, long stouts and short stouts—six different proportions for any one chest measure, which naturally covers all physiques, excepting only the most abnormal.

SCHMIDT HELD; JURORS RESCUE VICTIM'S BODY

NEW YORK, Oct. 3.—Just as the jury in the case of Anna Amos, charged with the murder of a young girl, was today being sworn in, a dramatic incident occurred which saved the victim's body from being buried in the ground.

LISTEN MOTHER DO BE CAREFUL

If child is cross, constipated, sick, give "California Syrup of Figs."

Don't scold your fretful, peevish child. See if tongue is coated; this is a sure sign its little stomach, liver and bowels are clogged with sour waste.

When infants, pale, feverish, full of cold, breath bad, throat sore, doesn't sleep or act naturally, has stomach-ache, indigestion, diarrhoea, give a small amount of "California Syrup of Figs," and in a few hours all the foul matter, from the bowels and stomach, will be expelled. The child will be happy and healthy again. Children love this harmless "fruit laxative," and mothers can't find fault after giving it, because it never cleans and cures.

Keep it handy, Mother! A little given today saves a sick child tomorrow. But get the genuine. Ask your druggist for a 50-cent bottle of "California Syrup of Figs," which has directions for babies, children of all ages and for grown-ups plainly on the bottle. Be sure you get the genuine. It is made by the "California Syrup Company." Hand back with contempt any other fig syrup.

LAURA HERRON'S WINK IN COURT COST HER \$20

SAN FRANCISCO, Oct. 3.—Because she winked at a girl friend in court, Miss Laura Herron, champion woman tennis player of Stanford University, was fined \$20 by Justice of the Peace H. W. Lamphun of Redwood City. She was charged with auto speeding. She said she was going only thirty-five miles an hour. Then she winked at her friend and the fine followed promptly.

more there came a shower of currency and silver from the back of the room. The spectators raised some amount to the five hundred spectators to launch Schmidt with a shout on his face, sprang from his chair and taking a string of beads and a crucifix from his throat, hurried them into the road behind him.

In addition to Foreman Hunt the other members of the jury were Vincent Astor (1), M. H. Marcus Low, Mortimer Rosenberg, Benjamin J. Greenwald, George W. Fairchild, Charles H. Key, Edwin Marston, Howard Weil, Nathan Reed and Patrick O'Connell.

After hearing the evidence, the jury found that the defendant was guilty of the crime. The jury also found that the defendant was guilty of the crime.

To Stop Gambling in Cotton Futures

WASHINGTON, Oct. 3.—An international trade association in cotton futures was organized in a meeting introduced in the House today by Representative Harrison of Mississippi, proposing to use authority in the President to ask other nations to co-operate in fighting cotton speculation. The resolution proposes that a commission of three be appointed and \$10,000 be appropriated for their expenses.

3 Months for Non-Support.
Albert Fox of No. 63 Washington street, Lynn, was today sentenced to three months in the House of Correction for James O'Brien in the Lynn court, for the non-support of his wife and four children.

SAY RAIL MEN WILL IGNORE FOSS WARNING

NEW HAVEN, Oct. 3.—The railroad men here, who are expected to ignore the warning of the Massachusetts legislature, which has threatened to cut off the supply of coal to the railroads, are expected to ignore the warning of the Massachusetts legislature, which has threatened to cut off the supply of coal to the railroads.

We Fit the Man Who Was Never Fitted Before

No such wide range of sizes and models has ever been shown by any New England store before. Perhaps no other store anywhere has ever equalled it.

Every store has Regulars, Stouts and Longs. But in this 'Live Store' you'll find suits cut and tailored specially for Short Men—for Short Stout Men—for Tall Stout Men—for Slim Men—for Extra Tall Slim Men (the 7 footer) and also for men who are inclined forward, or in plain words, "round shouldered" men.

Here are 16,000 suits and overcoats, all on individual hangers, smooth, unwrinkled, ready to step right into and wear away; and such a multiplicity of models and sizes that few if any alterations are usually required.

Kuppenheimer Fall Suits—\$18 to \$35

Snappiest young men's models ever seen in Boston. Great quantities of conservative cuts, too. Beautiful fabrics beautifully tailored in the true Kuppenheimer way.

Boys' 2-Pant Norfolk Suits

Durable all-wool fabrics, unusually well tailored, pants lined, seams taped and cross tacked. Extreme values at \$5, \$6, \$8, \$10.

Other Boys' Suits at \$5 to \$11.50

The New Currency Measure Should Be Made More Radical

Many changes in the Currency measure now pending before the United States Senate have been suggested by the bankers at public hearings in Washington. The expert opinions now fill more than a thousand printed pages of Senate reports.

Some excellent amendments not affecting the fundamental principle, WHICH IS GOVERNMENT SUPERVISION AND CONTROL OF THE NEW CURRENCY SYSTEM, have already been made. Many more will be, and ought to be, made before the measure is finally reported to the Senate.

But the city bankers still object to the measure as it stands, and these are their main objections:

- 1.—Big banks object to the withdrawal from their control of the bank reserves of the country. These reserves, amounting at times to 400 million dollars, are now concentrated in three central reserve cities, New York, Chicago and St. Louis. They furnish the cheap "call loans" to Stock Exchange houses. Without them the frenzied speculation of Wall Street could not be carried on.

- 2.—The city banks object to the creation of twelve federal reserve banks to hold these reserves for the use SOLELY IN COMMERCIAL TRANSACTIONS OF MERCHANTS AND MANUFACTURERS. The bankers want fewer reserve banks. Five large reservoirs of credit are better than twelve small ones. ONE GREAT RESERVOIR would be better than five, and five smaller ones better than twelve still smaller.

- 3.—The big bankers demand optional, not compulsory, subscription by the national banks to the stock of the new federal reserve banks to furnish working capital.

- 4.—They ask for six per cent. cumulative dividends for the bank subscriptions to the federal reserve banks' capital stock, instead of five, as provided in the bill.

- 5.—They want each federal reserve bank to be permitted but not COMPELLED (when required by the unanimous vote of the Government's Board of Control), to rediscount the commercial paper of any other federal reserve bank, and so bring relief from one district of the country to another if needed.

- 6.—Bankers are unanimous in insisting that federal reserve bank notes shall be issued by the federal reserve banks, not by the government for the treasury, and shall be made redeemable in gold.

The little, or country, bankers back up the big, or reserve, city bankers in all these objections, and strenuously, in their own behalf alone, resist the provision in the proposed currency measure abolishing collection charges by national banks on their customers' checks. All country banks derive a large part of their profits from this source, and nearly 8,000 of the 7,473 national banks of the country (83 per cent. of the entire number) are country banks.

The suggestion is freely made that if the country bankers' demands are not granted, they will not subscribe to the federal reserve bank stock, will abandon the national bank system, and continue business simply as State institutions. There are already 19,000 State banks and trust companies doing a general banking business, and only 7,473 national banks.

THIS PRESENTS AN EXTREMELY INTERESTING SITUATION. The national banks have enjoyed unprecedented favors from the government for fifty-one years and have greatly prospered.

Their average profits for ten years past have been nearly 9 per cent. on the total capital invested.

They have had the protection of the government and have profited by the privilege of issuing the money or circulating notes of the country. The government has conferred great benefits on the banks. The banks have served a useful purpose to the government.

But now the government is to exercise a closer supervision over the system of national banking. It is to put an end to the false pretence, the legal fiction, that when country banks' cash reserves are hurled into the maelstrom of Wall Street speculation, such cash reserves can, nevertheless, under the law be counted as "cash on hand" in country banks as if the cash were really in the vaults of the country banks.

The government is to provide a method for making agricultural loans to the farmers, for reasonable rates, upon adequate security, so that the farmer, who produces cheap food that everybody needs, shall have at least as fair treatment from the government and in the money market as the speculator in stocks, who produces nothing.

The Senate must frame the new currency measure, not in hostility to any class, but solely in the interest of all classes. It must be made a more radical measure not to injure any bank or banker, but to repair the great wrong which our banking system has done for half a century to those who cultivate the soil, for only to them can we look for the increased production required for the health of the nation; for harvests great enough to reduce the cost of living—the greatest need in the world today.

No individual banker is responsible or blamable for the great faults that have grown up under our present banking system. The government, i. e., the people themselves, are responsible, and the government must repair the wrong.

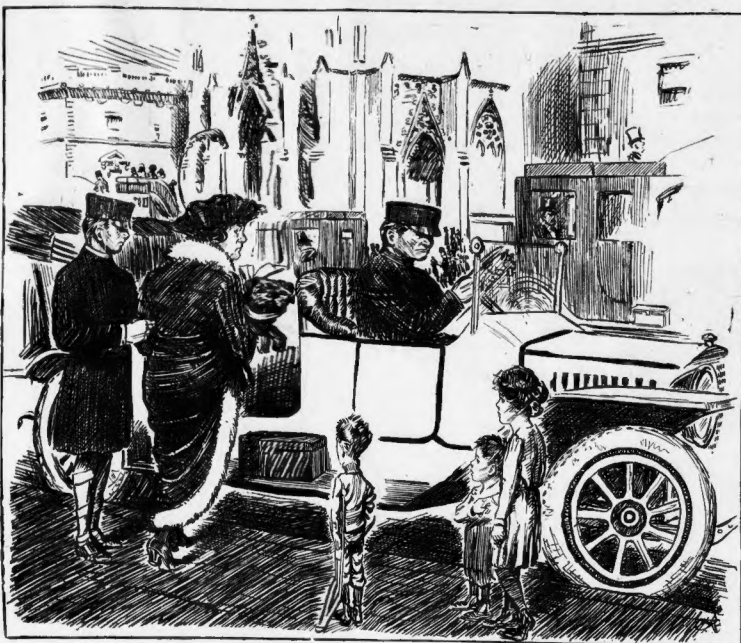

More inertia may, and probably will, induce many banks to hesitate before entering the new system of national banking. BUT IT WILL NOT FAIL FOR LACK OF SUPPORT. If the banks do not supply the requisite capital (\$100,000,000 at the start, for which a cumulative dividend of five per cent. is guaranteed by the government), then the privilege of supplying it should not be confined to the banks. It should be accorded to the people. They are rich. They have more than FOUR BILLION dollars in savings banks, on which they receive only three to four per cent. interest annually. The thirty-six millions already deposited in the postal savings banks AT TWO PER CENT., indicate how many persons prefer to confide their savings to the care of the government than to even our savings banks, which are so safe and so admirable.

The people, indeed, trust the government much more implicitly than bankers trust it.

Therefore, if the proposed system of federal reserve banks, to be managed by the private bankers under the supervision and control of the government, is not acceptable to the banks, then COMPLETE AND EXCLUSIVE GOVERNMENT CONTROL OF THE NATIONAL FINANCES, THROUGH THE VARIOUS SUB-TREASURIES ALREADY EXISTING, WILL BE THE NATURAL OUTCOME, AND IT WILL BE APPROVED BY THE SENTIMENT OF THE COUNTRY.

The pending currency measure will be made more and not less radical when the country is heard from.

Why Don't You Give THEM a Ride?

Does puppy need the fresh-blown air?
More than a cheek with hollowed side?
Do dogs possess such wistful eyes?
(Why don't you take THEM for a ride?)

Have pug dogs arms to clasp your neck?
Or hearts with love to open wide?
Can dogs fill gaps in lonely souls?
(Why don't you take THEM for a ride?)

RECIPE FOR A STATESMAN

By PERCY SHAW

If you yearn to be a statesman
Of the strictly modern kind,
You must chase the fleeting dollar
With a never flagging mind;
You must shun all erudition,
And with subtlety intense
Try to gauge your every action
With a view to recompense.

It were well to start in early,
Say at seventeen or so,
Just to train your budding talents
In the way that they should go.
Take a course in tape dancing,
Cultivate the Highland Flieg,
Study with a bag pipe artist;
Learn to rodel and to sing.

Hire a teacher of contention,
And a juggler of renown,
Imitate the tricks and antics
Of a many-sided clown.
After years of patient striving
You will find yourself elate,
When your country calls upon you
To direct the helm of state.

Think what majesty will sway you
When the Booking Agents fly,
Crowding down their tempting of-
fers,
Waiting for your sage reply.
Having solved the highest offer,
You will end the fierce suspense
As you scurry round the circuit,
Statesman in the modern sense.

Snap-Shots

YET, though a sense of grief
Comes with the falling trait,
And memory makes the Summer
 doubly pleasant,
In all my Autumn dreams
A future Summer gleams,
Fading the faintest glories of the present.
—George Arnold.

Let the sweet heavens endure,
Nor close and darken above me
Before I see you, quite sure
That there is one to love me;
Then let come what may
To a life that has been so sad,
I shall have my day.
—From "Maud."
Whom I sail to the Fortunate Islands
O'er the violet sea,
May one friend, my heart's friend,
Be there, a-sail with me.
On the breast of the deep, sweet waters,
By wood and hill and shore,
Sailing, sailing, sailing,
Till we come to Havre Bay.
In the peace of this Fortunate Islands,
By wood and hill and shore,
May one friend, my heart's friend,
And his mental chamber,
—Lillian Laupfert.

TWO BEWITCHING GIRLS, THEIR LOVES AND ADVENTURES

A fascinating, tantalizing combination in "A SONG OF SIXPENCE," a throbbing new serial, which begins in the magazine with NEXT SUNDAY'S AMERICAN.

The Nose as an Indicator of Character

Physician Invents Ap-
paratus Which Per-
fects Telephonic
Speech by Utilizing
Nasal Sounds.

By GARRETT P. SERVISS

NAPOLÉON preferred big-nosed men for his army leaders, and the correctness of his intuition concerning the significance of the nose as an indicator of character seems to have been vindicated by his experience at Waterloo, for the Duke of Wellington had one of the biggest noses of his day, and, as it were, by the Iron Duke's nose the English army remained invincible until both night and Blücher arrived.

Lavater, the physiognomist, laid great stress upon a large nose as a token of a sturdy, energetic nature, and this feature has generally been regarded in that light.

"Nasal Voice" Due to Nose Performing Functions Improperly

Science has discovered no reason why the nose should possess this kind of significance, but it has recently been found out that the nose plays a far more important part than had been suspected in the utterance of speech. The disagreeable sounds of what we call a "nasal voice" are due to the fact that the nose does not properly perform its functions. When it is well shaped within and unobstructed, the nose performs the voice, and without its aid syllables containing the consonants "m" and "n" cannot be clearly uttered.

Dr. Glover, of the Conservatory of Paris, has given special study to the functions of the nose in speech, and he points out that the chief trouble with the ordinary telephone is due to the fact that it does not transmit the sounds that are peculiar to the nose. Only the mouth sounds are transmitted to the vibrating membrane, the consequence being that many words are heard obscurely, the nasal sounds which would complete their utterance being absent.

Accordingly he has invented a special form of telephone transmitter, furnished with an extra tube, which gathers and transmits the sounds coming from the nose. The results have fully corresponded with his expectations, for when one speaks through a telephone of this kind the words are transmitted in their integrity, the "m" and "n" sounds are distinctly blended with the others, and the reproduction of the speaker's voice is perfect.

The speaker himself, it is claimed, finds it easier to use this form of telephone, for it requires less exertion of the voice. It is not necessary to speak loudly in order to be well heard. Dr. Glover has also found that interposition of a very thin paper between the mouth and nose of the speaker and the vibrating apparatus does not in the least diminish the distinctness of the sounds, while it serves to prevent possible contamination.

He calls his new apparatus the "physiological telephone," not merely because of the precaution to prevent contamination, but more especially because with its aid, for the first time, the full physiological value of the voice is utilized in telephonic transmission. The voice of the speaker is at the same time rendered clearer to the hearer and its timbre is completely transmitted, so that the sound is more natural, as if the speaker were actually present.

For those who are curious about such things it may be interesting to remark that this function of the nose in speech may possibly have some connection with the observation of the physiologists that the nose is a significant feature in revealing the moral character of its possessor. Every part of the body that is employed by the mind for expressing itself inevitably acquires telltale marks which enable a shrewd observer to discern something of the mental make-up. It is notably so with the mouth, not because it is employed in eating, but because it is an instrument for the expression of thought through the medium of speech.

Mental Characteristics Imprint Themselves on One's Features

Since the nose also takes part in the verbal utterance of thought, why should it not, too, exhibit similar indications of character? It is not alone upon the size of the nose that the physiologists base their conclusions, but upon peculiarities of shape and appearance which are gradually developed and emphasized as the individual grows older and his mental characteristics begin to imprint themselves on his features.
